This book, like its predecessor, Strathmore, is a study of British court life, and, like it, a delineation of those features in this life which prove that the vice of the alums are alike in kind, and only distinguished by the artificial boundaries of wealth and position. Its hero, Ernest Chandos, is a patrician lord, inheriting almost the asking, but haughtily refuses to do so. He enters upon life with countless advantages, but with the tremendous disadvantage of deep-scated and vindictive enmity, in an unrecognized and maligeant halfbrother, John Trevenna, who, when a boy, had sworn to drag him to the earth, and who devoted all the talent of a remarkably fertile brain, and the enterprise of a won drously industrious life, to the accomplish ment of this iniquitous purpose. Trevenna, released, becomes the steward of his benefactor's household. Chandes, a careless vochosen mement, are accumulated upon him; and the king of fashion, the ruler of aristoeracy, the man who had been living in ental tale, whose palaces were crowded with elegancies, whose word was law for princes, finds himself a beggsr in an hour, involved to the entire extent of his magnificent fortune, and all unsuspicious of the wrought. His affiance deserts him, society turns its back upon him, those who had reveled in his hospitality sneer at him; he | is alone in a world of indifference or enmity. For a moment he is stunned.
